## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,5-14,18-26,39 and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by Hurst et al. (U.S. Patent 3705932).

Hurst et al. disclose an automated manufacturing line for making a composite article from first and second thermoformed workpieces by automatically assembling the first the thermoformed workpiece to the second thermoformed workpiece, comprising: a thermoforming station (300) for thermoforming the first and second thermoformed workpieces in a plastic sheet; a trim station (400) for trimming at least the first thermoformed workpiece from the plastic sheet; and an assembly station (500) for assembling the trimmed first thermoformed workpiece onto the second thermoformed workpiece to form the composite article (Figs. 1-9: col. 2, lines 49-54; col. 9, lines 27-63).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-5 and 40-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hurst et al. .

The limitations of assembling first thermoformed workpiece and the second workpieces by press-fitting/snap-fit/adhesive coupling is well known in the art and It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize these well known method on the method of Hurst so as to manufacture the two-piece assembled workpieces.

***Allowable Subject Matter***

5. Claims 15-17,27-38 and 82-85 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

6. Applicant's arguments filed 6/16/06 have been fully considered but they are not persuasive. The limitation "trimming" is broad enough to include the process of Hurst et al. .

***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3726

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
